SHER KHAN

Software Engineer (.NET)

Karachi, Pakistan | sherbalochcs@gmail.com | +92 328 2342800 | LinkedIn | GitHub | Portfolio Website

Summary

Software Developer with 3+ years of experience delivering desktop and web applications for local businesses. Skilled in C#, ASP.NET Core, SQL Server, Angular, Entity Framework Core, and REST APIs. Built and deployed business solutions across education, retail, restaurant, and accounting domains. Interested in Software Engineering, Data Analytics, and AI-powered applications and roles.

Experience

Software Developer | Self-Employed *2022 – Present*

- Delivered custom desktop and web applications for 10+ local businesses including schools, academies, retail stores, restaurants, and accounting firms.
- Gathered requirements directly from business owners and translated them into software solutions.
- Developed solutions using C#, WinForms, ASP.NET Web Forms, and .NET technologies, Designed relational databases, and implemented reporting systems using SQL Server, RDLC Reports, and Crystal Reports.

IT Intern – Askari Bank IT Hub, Karachi *July 2025 – August 2025*

- Provided IT support for multiple Askari Bank branches across Karachi, assisting in banking system maintenance and troubleshooting.
- Gained exposure to enterprise banking IT operations, internal applications, and coordinated with IT teams for issue resolution.

Projects

ZAB Careers (FYP) – *Angular 21, .NET 10 Web API, and SQL Server*

- Built an AI-powered Applicant Tracking System using Angular, ASP.NET Core Web API, EF Core, and SQL Server.
- Implemented JWT authentication, RBAC, email workflows, and resume matching using Mistral AI.
- Developed PWA features to improve accessibility across devices.

ZAB GPT – *Docker, AnythingLLM, OpenRouter, RAG*

- Built a custom GPT-style AI assistant for university career and job-related queries using AnythingLLM, Docker, and OpenRouter API. Implemented Retrieval-Augmented Generation (RAG) with PDF, DOCX, and Markdown knowledge sources to provide contextual and intelligent responses for students and recruitment workflows.

Enterprise Resource Planning (ERP) System – *ASP.NET Web Forms, SQL Server, Crystal Reports*

- Developed a full-scale enterprise ERP system for business operations management including accounting, inventory control, sales, purchasing, HR management, and reporting. The system supports multi-user access, role-based control, and complete financial and operational tracking for small-to-medium businesses.
