SHER KHAN

Software Engineer | .NET Developer

Karachi, Pakistan | sherbalochcs@gmail.com | +92 328 2342800 | LinkedIn | GitHub | Portfolio Website

Summary

Software Developer with 4+ years of experience in requirement gathering, developing, and deploying desktop and web applications for online and local clients. Skilled in C#, ASP.NET Core, SQL Server, Angular, EF Core, REST APIs, Web Forms and WinForms. Interested in Software Engineer, Data Analytics, and AI related projects and opportunities.

Experience

Software Developer | **Research Gate, Pakistan** | *January 2022 – June 2026*

- Developed and maintained custom desktop and web applications for 10+ local businesses including accounting, schools, academies, super marts, and restaurants.
- Gathered requirements directly from clients and developed solutions using C#, WinForms, ASP.NET Web Forms, SQL Server, and Crystal Reports.

IT Intern | **Askari Bank IT Hub, Karachi** | *July 2025 – August 2025*

- Provided IT support for multiple Askari Bank branches across Karachi, assisting in banking system maintenance and troubleshooting.
- Gained exposure to enterprise banking IT operations, internal applications, and coordinated with IT teams for issue resolution.

Projects

ZAB Careers (FYP) – *Angular, ASP.NET Core Web API, and SQL Server* – GitHub Link

- Built an AI-powered Job Portal and ATS System with User and Admin dashboards for smooth hiring process.
- Implemented JWT authentication, BCrypt for hashing, SMTP for emails, and Mistral AI model for resume analysis.

Enterprise Resource Planning (ERP) System – *ASP.NET Web Forms, SQL Server, Crystal Reports* – GitHub Link

- Developed and sold an ERP system to local business for business operations and management of accounting, inventory, sales, purchasing, HR management, and reporting. The system supports multi-user access, role-based access, and complete financial solution for small-to-medium businesses.

ZAB GPT – *Docker, AnythingLLM, OpenRouter, RAG*

- Built a custom GPT as AI assistant for university career and job-related queries using AnythingLLM, Docker, and OpenRouter API.
- Implemented RAG approach with custom data source of PDF, DOCX, and Markdown files for contextual and intelligent responses within organization dataset.
